

C-P Flexible Packaging Achieves SQF Certification

July 3, 2013 – C-P Flexible Packaging, a York, Pennsylvania based company producing flexible food packaging for a variety of Fortune 500 customers, recently achieved SQF 2000 Level 2 Certification. SQF, Safe Quality Food, is a Food Safety Management System designed to provide organizations with a rigorous system to manage food safety risks, provide safe product, and provide customers with a recognized food safety certification.

“C-P has always been committed to being an industry leader in supplying flexible packaging to our customers”, stated President & CEO Tony Vaudo. He also indicated, “Safety, quality, service, innovation, and sustainability are key elements that C-P brings to ensure our customer’s success. By earning our SQF Certification, it not only shows that C-P has a globally recognized food safety and quality plan in place, it also demonstrates our continued commitment and support for assisting our customers with their food safety initiatives.”
